How to add fonts to system

```
# download nerd fonts
wget
https://github.com/ryanoasis/nerd-fonts/releases/download/v3.4.0/0xProto.zip
mkdir fonts
cp 0xProto.zip fonts
cd fonts
unzip 0xProto.zip

# Copy to font location
sudo cp *.{ttf,otf} /usr/local/share/fonts/

# Update the font cache
fc-cache -f -v
```

```
sudo apt-get -y install fonts-noto-color-emoji
```

```
sudo apt-get -y install fonts-font-awesome
```

Add application to menu

copy application to bin

```
sudo cp Downloads/logseq /usr/local/bin
```

download app icon

```
wget
https://cdn.jsdelivr.net/gh/homarr-labs/dashboard-icons/webp/logseq.webp
mv logseq.webp logseq.png

cp logseq.png ~/.local/share/icons/logseq.png
```

create .desktop file

```
sudo vim ~/.local/share/applications/logseq.desktop
```

content of desktop file

```
[Desktop Entry]
Name=Logseq
Exec=/usr/local/bin/logseq
Icon=/home/karcio/.local/share/icons/logseq.png
```

```
Type=Application
Categories=Office;Utility;
Terminal=false
```

Add flatpak application to menu

Create:

```
vim ~/.local/share/applications/prusaslicer.desktop
```

Paste:

```
[Desktop Entry]
Name=PrusaSlicer
Exec=flatpak run com.prusa3d.PrusaSlicer
Icon=com.prusa3d.PrusaSlicer
Type=Application
Categories=Graphics;
```

Then make it executable:

```
chmod +x ~/.local/share/applications/prusaslicer.desktop
```
