How to compile vim with python3 enabled

```
sudo apt install -y python3-distutils python3-dev
sudo apt install libncurses-dev
sudo apt-get install build-essential
mkdir ~/src
cd ~/src
git clone https://github.com/vim/vim.git
cd vim/src
./configure --enable-python3interp \
    --with-python3-config-dir=/usr/lib/python3.11/config-* \
    --with-python3-command=/usr/bin/python3 \
    --without-x
make
sudo make install
/usr/local/bin/vim --version
```
